

FUJI KING DEBARKER

Specifications

Features

- **Quick Change™ Debarking Blocks** allow the customer to quickly change the abrasive blocks when worn or to adjust block profile for changing conditions.
- Fixed side wall and centre comb debarking plates are available
- Modular design to ensure fit for any application
- Heavy duty design for durability and long life
- Inclined abrasive plates for dealing with tough species and frozen conditions
- Rotor comb (patented) that expels bark to the waste conveyor below, ensuring complete separation of bark from the wood stream
- Various debarking plate profiles to suit variations in species, moisture content, season and age of wood
